Art Unit: 2871

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-5, 7-13 and 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyaji, USPAT 6,479,120.
- 5. Miyaji discloses and shows in Figs. 3 and 4, a method of repairing electrode pattern defects comprising:
 - a camera (40) and an image processing section (42) that detect a defect and determines the positioning by processing image data (col. 6, lines 51-54, 62-64) (applicant's performing an optical inspection for determining electrode pattern defects); and

- ' '1

Art Unit: 2871

- a defect repair sheet for repairing electrode wires having a pit (Fig. 2, col. 6, lines 64-66; col. 7, lines 18-22) (applicant's performing a first repairing process for repairing the electrode pattern electrode defects).

Miyaji also discloses the use of laser beam to remove the defective portion of the electrode pattern (col. 8, lines 38-61).

Accordingly, claims 1, 4, 7-10, 12 and 17-19 are anticipated.

As to claim 2, Miyaji also discloses that the electrode pattern is a sustain electrode pattern of a plasma display panel (col. 5, lines 60-63; col. 6, lines 1-3).

As to claims 3 and 11, sustain electrode is inherently composed of either a transparent conductive material or a metal conductive material.

As to claim 5, 13, 15 and 16, Miyaji also disclose the step of partially or completely filling the pit with a material layer (applicant's conductive paste) (col. 7, lines 49-57).

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. Claims 6 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miyaji.
- 8. Miyaji differs from the claimed invention because he does not explicitly disclose the type of material used for the conductive paste. However, use one of silver paste,

Application/Control Number: 10/707,560 Page 4

Art Unit: 2871

ITO paste, IZO paste, gold paste, or silver glue as the conductive paste to create conductivity is common and known in the art and thus would have been obvious.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tarifur R. Chowdhury whose telephone number is (571) 272-2287. The examiner can normally be reached on M-Th (6:30-5:00) Friday Off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Kim can be reached on (571) 272-2293. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
